

# FOAMplus® Mini

The FOAMplus® Mini System is a complete stand-alone work station that dispenses foam into a bag. The system uses a convenient self-mixing chemical component pack that is placed inside the dispensing compartment. It requires very little space and can be placed on a work table and transported easily to different areas in your shipping department.

- Minimal start-up cost
- Designed for low to medium user
- Protect all size and shapes of products
- Four different bags available: small, medium, large and tube style
- No chemical drums or solvents
- Small footprint table top design
- Uses standard 110v power
- Optional service contract available

*Easy-to-load, self-mixing chemical component pack creates 13.35 cubic foot of foam packaging.*

*Four standard bag sizes include: 18" x 18", 18" x 24", 22" x 27" and 10" x 32"*

*FOAMplus® Mini easily integrates into any packing station.*

# Foam-in-Place packaging made easy and affordable

The FOAMplus® Mini System provides superior product protection, has easy-to-use features, and offers many user benefits. With the touch of a button, using five different preset volume settings, operators can quickly create a variety of foam filled bags to support the packaging needs in shipping rooms, multiple pack stations, and even the production department.

- Easy to use
- Utilize five preprogrammed volume settings
- Lightweight and portable
- Pack directly into the carton or create foam protection in a custom mold
- Service contract optional

## Use FOAMplus® Mini to create your own custom molded packaging

FOAMplus® Mini System makes it easy to produce your own custom packaging on-demand. The preformed cushions can simply be placed directly into the packaging carton around the product and the package is ready to go. On-demand custom packaging molds save valuable time, costly freight and storage space.

## Basic In-the-Carton Packaging Steps

*Place the expanding foam-filled bag into the carton.*

*Insert the product into the expanding foam bag.*

*Place a second expanding foam bag on top of the product and fold the carton closed.*

*A top and bottom foam cushion is created inside the carton to protect your product.*
